Hot Potato

Adventurers and Enemies fight over a handheld object/artifact.

1.) If an adventurer or enemy holding the object is hit by a Melee Attack, the attacker gains control of the object (in addition to any damage dealt).
2.) If any adventurer or enemy holding the object is hit by a Ranged Attack, they use their Reaction to roll a DEX Save: DC 15. If they fail, the object is dropped.
3.) If an adventurer or enemy holding the object is forced to move or freeze involuntarily (Ex: Hold Person), the object automatically falls to the ground.
4.) Action or Bonus Action to pick up the object.
5.) Action to grapple (Contest STR) to take the object.
6.) Action or Bonus Action to throw the object up to 60ft.
7.) Reaction to catch the object (DEX Save: DC 15) this is rolled at Disadvantage if the object was thrown farther than 20ft. If they cannot use a Reaction, the object falls to the ground.
8.) Reaction to Intercept
    a.) The interceptor must be within reach to the catcher.
    b.) The interceptor must roll higher than the catcher's DEX Save.
    c.) If both the interceptor and catcher roll below the DC Save, the object falls to the ground.
9.) Storing the object takes a full turn. This includes their Reaction and their Movement in addition to their Action and Bonus Action. (DC: 30 Sleight of Hand to Hide the object.)

Tick Tick Tick

Adventurers have to defuse a bomb while being harrassed by the enemy.

1.) Bomb is set to go off after 10 rounds.
2.) In order to defuse the bomb, an adventurer must use an Action to succeed on an INT Saving Throws. There are three checks each going up in difficulty (DC 15, DC 20, DC 25).
    a.) If the adventurer fails a roll they must start over at the beginning DC.
    b.) If the adventurer switches with another, the new adventurer must start over at the beginning.
    c.) Only one adventurer may try to defuse the bomb at a time. (If during a round of combat, a successful INT Save is made, no one else may try to defuse the bomb that round).
    d.) Attempts to roll the INT Save to defuse the bomb may only be made on the square/hex where the bomb is located.
3.) If the bomb explodes inside an interdimensional pocket (Ex: Bag of Holding, a Portable Hole, Rope Trick, or Mordenkainen's Magnificent Mansion) creatures, objects, and

terrain within 300 yard radius of the explosion on both the Material and Ethereal Plane, or the pocket dimension take 10d10 Force Damage plus an an additional 8d6 Fire Damage and are cast into the Astral Plane. Creatures, Objects, and Terrains are pushed an additional 300 yards, possibly taking additional bludgeoning damage. A 10ft tall, 5ft wide gateway to the Astral Plane appears at the source of the explosion on both the Material and Ethereal Planes and cannot be removed unless done so by a Wish spell.

Fight and Flight

Adventurers must fight their way out of a collapsing dungeon.

1.) Each room in the dungeon collapses in three stages.
    a.) Rumbling: The ground begins to shake. Creatures in the room must succeed on a DC 10 DEX Save or the room is considered difficult terrain for as long as they remain in the room.
    b.) Crumbling: Parts of the ceiling begin to fall. Each creature rolls 1d20. The Player(s) who rolled the lowest or tied for the lowest each take 2d6 Bludgeoning damage (Half as much on a successful DEX Save DC 13) and are knocked prone automatically. Enemies in the room do the same, respectively.
    c.) Destroyed: The room becomes impassable. Creatures who are inside the room during its collapse take an automatic 2d10 bludgeoning damage each turn and are Restrained.
2.) At the start of the round, if a room is in a state of collapse it moves to the next stage of collapse.
3.) The first time an adventurer enters a room (other than exits), the DM determines what stage a room is by rolling a d100.
    a.) 01-15: The room is Destroyed
    b.) 16-35: The room is Crumbling
    c.) 36-75: The room is Rumbling
    d.) 76-00: The room is not in a state of collapse.
4.) If a room is not in a state of collapse at the start of the round, there is a cumulative 30% chance that it starts Rumbling.
5.) Exits, rooms that connect to areas outside the dungeon, only start Rumbling if all connected non-exit rooms are destroyed.
6.) Enemies and adventurers may use their reaction to “lock into combat” rather than take an attack of opportunity. If they do, their opponent loses their Bonus Action and Reaction on their next turn and must use their Action to either Attack or Disengage. Until one becomes incapacitated or the Disengage Action is used, both creatures may only use the Attack Action on each other and cannot target other creatures. Perception and Investigation checks are made at Disadvantage.
