# Shifting Runes

**What You Need:**

- 1d20
- 20 Runes
    - 6 Coin Runes (2-6 of Clubs)
    - 4 Crown Runes (4 Kings)
    - 3 Flame Runes (three 10s)
    - 2 Serpent Runes (2 Jokers)
    - 2 Moon Runes (2 Queens)
    - 2 Sun Runes (2 Jacks)
    - 1 Star Rune (1 Ace)

**How to Play:**

- DM, playing as The House, shuffles the 20 runes and places them on the table upside down in a 5 x 4 grid as shown below:

| | | | | |
|---|---|---|---|---|
| 1 | 2 | 3 | 4 | 5 |
| 6 | 7 | 8 | 9 | 10 |
| 11 | 12 | 13 | 14 | 15 |
| 16 | 17 | 18 | 19 | 20 |

- Players then place wagers on symbols and/or positions before the d20 is rolled.
- Once all bets are placed, the d20 is rolled.
- The DM turns over the rune that corresponds to the number rolled on the d20.
- Payouts are listed depending on if the player bet on runes or on a specific position number.
- Once all payouts are finalized, the DM shuffles the runes, placing them upside down and the process repeats once more.

**Position Bets:**

Bet on an exact position (1–20).The player wins, no matter the rune, should the die roll match the position number.

- Pays 15:1

**Symbol Bets:**

A player may bet on a specific rune. The player wins if the rune revealed matches the rune bet upon.

| | | |
|---|---|---|
| Coin | 30% Chance | Pays 2:1 |
| Crown | 20% Chance | Pays 3:1 |
| Flame | 15% Chance | Pays 4:1 |
| Serpent | 10% Chance | Pays 5:1 **+** |
| Moon | 10% Chance | Pays 5:1 **+** |
| Sun | 10% Chance | Pays 10:1 |
| Star | 5% Chance | Pays 20:1 |

*The Serpent Rune* – Should a player bet on the Serpent Rune and it is revealed, the betting player's next wager will payout double should that bet be correct. Only applicable in the next round of betting.

*The Moon Rune* – If at least one player bet on the Moon Rune and it is revealed, a free bonus roll is granted to the entire table. The DM does not reshuffle the runes. Instead the next round of betting immediately begins. Players may not bet on the revealed position number but may still wager on the secondary Moon Rune. If the next revealed rune is the second Moon Rune, this process repeats and any player who bet correctly receives an 18:1 payout. If the roll matches the position of the original Moon Rune, House takes all and during the next round (after the DM has shuffled and replaces the runes), they may flip over any rune on the table, that position cannot be bet on for that round.

**Box Bets (Optional)**

Bet on four runes that lie adjacent to each other in a box. The player wins, no matter the rune, should the die roll match any of the four position numbers.

- Pays 3:1

# Wings

**What you Need:**

- 3d6 for each player and the DM

**How to Play:**

- Each round of play comes in 3 phases of play called Wings.
- **First Wing**
    - The DM, Playing as The House, rolls the first d6.
    - All Players, in a turn-order, ante and roll their 3d6.
- **Second Wing**
    - The DM rolls the second d6.
    - All Players, in a turn-order, may choose to do any/all of the following options:
        - *Reroll Wager*: Bet Minimum Ante to reroll one die. Player must keep the new roll.
        - *Safety Wager*: Side bet Minimum Ante+ to protect vs. ties.
        - *Increase Wager*: Increase original wager by Minimum Ante+.
        - *Flap Wager*: Side bet Minimum Ante+ on the final die roll by the house.
- **Third Wing**
    - The DM rolls the final d6.
    - Compare totals between house and player and resolve any payouts.
    - Ties go to The House unless that player placed a Safety Wager.
    - House triplets sweep (no player receives a payout and house takes all unless that player also has triplets, in which case, it's a push).

**Payouts:**

In order to receive a payout, players *must* beat The House total. Ties go to The House (unless a Safety Wager was placed). All bonuses stack on top of the base 1:1 payout for beating The House. *(ex: Player rolled a 15, The House rolled a 14 – payout is 2:1 because the player rolled a "High Roll" and beat The House total)*

| | |
|---|---|
| Player Total > House Total | 1:1 |
| High Roll ≥ 15 | 1:1 |

| | |
|---|---|
| Any Pair | 2:1 |
| 7 or 13 | 3:1 |
| Straight | 5:1 |
| Triplets | 10:1 |

**Second Wing Wagers and Additional Payouts**

There are two side bets that can be made during the Second Wing, *Safety Wagers* and *Flap Wagers*. Side bets *do not stack* on top of the base 1:1 payout for beating The House.

- *Safety Wager*: If a tie is rolled, The House takes the Safety Wager instead of the original Wager. If the player decides to bet an Increase Wager and a Safety Wager, those bets must be the same.
    - Should the player and The House have an exact die match (not just a die total tie), payout on the safety wager is *100:1*

| | |
|---|---|
| Exact Die Match with The House | 100:1 |

- *Flap Wager*: Players may decide to bet on the outcome of the third die roll, betting either – Odds or Evens, High or Low, or a specified number.

| | |
|---|---|
| Odd/Even | 1:1 |
| High (4,5,6) / Low (1,2,3) | 1:1 |
| Exact Match on Specified Number | 6:1 |
